Your commercial multi-modal transport system

Transit + MoDe:Pro
Using Transit Connect with one or more bikes could benefit:

- Couriers, for fast, efficient post and package deliveries in congested cities
- Tradesmen like plumbers and electricians, for small groups working together and reaching customers faster
- Branded deliveries, for food, perishables, flowers and take-out meals delivered quicker than ever
- City services, for police, health and emergency personnel reaching any area of the city no matter what the traffic

MoDe: Link

App controls e-bike functions and features
- Shows navigation, route planning, delivery scheduling and rider tracking
- Displays battery charge and ride stats
- e-bike only works when paired with an authorised smartphone

e-bike specs

- 200W motor with 9Ah battery
- Speed up to 25km/h
- Hydraulic disc brakes
- High power LED lights
- Brake and turn indicators
- Navigation and alerts via hand grips
- Tough, rugged construction with 20-inch wheels

Flexible
Modular boxes fit on the bike’s tail-rack for transporting goods and equipment

Practical
Folding frame slots easily into Transit’s space-saving storage

Compatible
Ford’s SYNC voice-activated connectivity system can show the app on the vehicle’s display

Efficient
The e-bike charges when docked in the vehicle, making it always ready for action and use

Innovative
Benefit from improved mobility in congested urban areas

Productive
Reach more customers and do more business - a van can act as carrier and support vehicle, and be combined with more than one e-bike

Adaptive
Fold and tow the bike indoors and through pedestrian areas

Safe
Rear-facing ultrasonic sensor warns the cyclist when a vehicle is overtaking and alerts motorists by illuminating handlebar lights
