

ALL-NEW FORD SUPER DUTY PICKUP FRAME

The all-new F-Series Super Duty is built on a frame that is up to 24 times stiffer; on pickup models, it is fully boxed for reduced noise, vibration and harshness. It is the strongest Super Duty frame ever, made of 95 percent high-strength steel to handle the extreme payload and towing demands of customers who put their trucks through extreme work. The frame features:

E-coat paint process for extreme durability and corrosion protection

Available Wheelbases (inches):

· 141.6 · 148 · 159.8 · 164.2 · 176

Six times more high-strength steel than current truck

Frame rails 1.5 inches taller than current frame for added stiffness

Through-welded, closed-section crossmembers help increase torsional stiffness versus current frame

Twin-I-beam front suspension provides the durability Super Duty customers expect
