¹Ford test data based on typical industry methodology using 1-ft rollout. Your results may vary. ²Calculated via peak performance of the electric motor(s) at peak battery power. Horsepower and torque are independent attributes and may not be achieved simultaneously. Your results may vary. ³Ford does not recommend using summer tires when temperatures drop below approximately 45 deg F (7 deg C) or below (depending on tire wear and environmental conditions), or in snow/ice conditions. If the vehicle must be driven in these conditions, Ford recommends using All-season or snow tires. ⁴Based on full charge. Actual range varies with conditions such as external environment, vehicle use, vehicle maintenance, lithium ion battery age and state of health.
