<sup>1</sup> Targeted range for vehicles built starting fall 2022. Based on full charge. Actual range varies with conditions such as external environment, vehicle use, vehicle maintenance, lithium ion battery age and state of health. <sup>2</sup> Ford test data based on typical industry methodology using 1-ft rollout. Your results may vary. <sup>3</sup> Calculated via peak performance of the electric motor(s) at peak battery power. Horsepower and torque are independent attributes and may not be achieved simultaneously. <sup>4</sup> Ford Blue Cruise is a hands-free driving feature. <sup>5</sup> Ford BlueCruise feature activations requires FordPass App and modem activation.

<sup>6</sup>Range and charge time based on manufacturer computer engineering simulations and EPA-estimated range calculation methodology. The charging rate decreases as battery reaches full capacity. Your results may vary based on peak charging times and battery state of charge. Actual vehicle range varies with conditions such as external environment, vehicle use, vehicle maintenance, lithium-ion battery and state of health. <sup>7</sup>Cargo and load capacity limited by weight and weight distribution. Cargo capacity based on load floor in the lowest position. <sup>8</sup>Your battery is covered for 8 years or 100,000 miles, whichever comes first, retaining a minimum of 70% of its original capacity over that period.
