Every 1967 Bronco has been designed and quality-built to provide safer, dependable service! Numerous safety items are standard in every Bronco. These include a dual safety hydraulic brake system that permits the front or rear brakes to operate in the event that one sub-system fails. In addition, the transfer case T-bar shift lever provides a positive lock to prevent the transfer case from jumping out of four-wheel drive. However, no vehicle can be safer than the driver himself!
