## Andrew Brumley

Chief Engineer, Vehicle Evaluation and Verification, Ford of Europe

Andrew Brumley is chief engineer, Vehicle Evaluation and Verification, Ford of Europe, responsible for physical prototyping, verification processes and all test facilities in the Europe region.

Previously, Brumley served as chief engineer for Ford engine programs in Dagenham, UK.

Since joining Ford in 1992, Brumley has held various roles in engine development. His extensive experience includes contributions to a number of gasoline and diesel engine programs, including overseeing the development of Ford's latest EcoBlue diesel engine and new 3-cylinder gasoline engine architecture.

Brumley earned a bachelor's degree in Mechanical Engineering from Aston University and a Masters in Automotive Engineering from the University of Hertfordshire.
