Mobility Experiment: City Driving On-Demand, London

Fact Sheet: City Driving On-Demand

While there are many car-sharing services based on the reservation model, the focus of this experiment is on-demand use. Researchers are exploring how to optimize the service, such as offering pay-by-minute and enabling one-way trips across the city. A fleet of Ford Focus Electric vehicles and Ford Fiestas with EcoBoost powertrains is located across London. Users can register, get directions to the nearest service location, reserve a vehicle and pay – all through a mobile app. The London service targets a better customer experience and improved operational efficiency compared to existing car-sharing models. Car-sharing through the use of zero and low-emissions vehicles can reduce congestion and pollution.

The Experiment

Ford car-sharing on-demand in London targets a better customer experience and improved operational efficiency compared to existing car-sharing models.

About Ford Motor Company

Ford Motor Company is a global automotive and mobility company based in Dearborn, Michigan. With about 202,000 employees and 62 plants worldwide, the company's core business includes designing, manufacturing, marketing and servicing a full line of Ford cars, trucks and SUVs, as well as Lincoln luxury vehicles. To expand its business model, Ford is aggressively pursuing emerging opportunities with investments in electrification, autonomy and mobility. Ford provides financial services through Ford Motor Credit Company. For more information regarding Ford and its products and services, please visit www.corporate.ford.com.
