

## Ford Expands Recall for Vehicles Containing Certain Takata Airbag Inflators

Ford is expanding its safety recalls on vehicles that have certain Takata airbag inflators after Takata declared that those inflators are defective, bringing the total number of Ford vehicles recalled for Takata airbag inflators to 1,509,535 vehicles to date.

This expanded recall follows Takata's notification to the U.S. NHTSA last week that certain of its airbag inflators are defective, affecting several automakers across the industry. For Ford, affected vehicles include:

- 2005-2014 Ford Mustang vehicles built at Flat Rock Assembly Plant for driver side airbag inflators;
- 2005-2006 Ford GT vehicles built at Wixom Assembly Plant for driver side airbag inflators;
- 2004 Ford Rangers built in North America at Edison Assembly Plant and
- 2004-2006 Ford Rangers built at Twin Cities Assembly for passenger side airbag inflators.

As disclosed in November 2014, Ford is aware of one airbag deployment that might be related to the issue, in which a driver's leg was injured by a metal fragment when the airbag deployed after a crash. Ford has not seen any other inflator ruptures on Ford vehicles in the field or in testing to date.

A total of 1,490,764 vehicles in North America are now affected by this expanded recall, including 1,380,604 in the United States and federalized territories, 93,207 in Canada and 16,953 in Mexico.

Dealers will replace the airbag inflator at no cost to the customer.

Customers who want to know if their vehicle is included in these recalls can visit [www.ford.com](http://www.ford.com) and click on safety recalls at the bottom of the page. Customers can then enter their Vehicle Identification Number (VIN) to see any open safety, compliance or emissions recalls, as well as customer satisfaction programs.

### About Ford Motor Company

*Ford Motor Company (NYSE: F) is a global company based in Dearborn, Michigan, that is committed to helping build a better world, where every person is free to move and pursue their dreams. The company's Ford+ plan for growth and value creation combines existing strengths, new capabilities and always-on relationships with customers to enrich experiences for and deepen the loyalty of those customers. Ford develops and delivers innovative, must-have Ford trucks, sport utility vehicles, commercial vans and cars and Lincoln luxury vehicles, as well as connected services. Additionally, Ford is establishing leadership positions in mobility solutions, including self-driving technology, and provides financial services through Ford Motor Credit Company.
