Ford Motor Company Invention is Finalist for Fast Company 2017 World Changing Ideas Award

DEARBORN, Mich., March 20, 2017 – Ford Motor Company's On-the-Go H2O is in the spotlight – selected as a finalist in both the [Transportation and Developing-World Technology categories](#) as part of *Fast Company's* 2017 World Changing Ideas Awards. The awards showcase 12 winners and nearly 200 finalists, honoring businesses, policies, projects and concepts that offer innovative solutions to the issues facing humanity.

[On-the-Go H2O](#) was developed by Ford engineers Doug Martin, John Rollinger, Ken Miller, and Ken Jackson. The group brought the concept to life after an idea struck: what if cars could be a source of water? The system collects condensation from vehicle air conditioners, then filters and pumps the fluid into a faucet located inside the car to provide drinking water.

The project will appear in *Fast Company's* April issue, which will hit the newsstand on March 27 and will celebrate the world changing ideas finalists and highlighting Ford's On-the-Go H2O.

About Ford Motor Company

Ford Motor Company is a global automotive and mobility company based in Dearborn, Michigan. With about 202,000 employees and 62 plants worldwide, the company's core business includes designing, manufacturing, marketing and servicing a full line of Ford cars, trucks and SUVs, as well as Lincoln luxury vehicles. To expand its business model, Ford is aggressively pursuing emerging opportunities with investments in electrification, autonomy and mobility. Ford provides financial services through Ford Motor Credit Company. For more information regarding Ford and its products and services, please visit www.corporate.ford.com.
