

Ford Increasing GT Production to Make Ownership Dreams a Reality for 350 More Supercar Fans

- Due to the popularity of Ford GT, Ford is raising the number of supercars it will build to 1,350 – up from 1,000; Ford GT production will run for a total of approximately six years
- Ford is re-opening the final owner application process for select global markets on Nov. 8; prospective owners can submit their applications at FordGT.com for 30 days
- Previous applicants need to confirm or modify their original application to be considered in this final application window to own a Ford GT

Dearborn, Mich., Oct. 18, 2018 – Ford Motor Company is increasing Ford GT production to 1,350 vehicles after more than 6,500 applicants raced to sign up for the original 1,000 cars allotted in 2016 – even before the car recaptured LeMans glory later that year.

“The response to our Ford GT has been unprecedented, with initial demand outstripping supply by more than six-to-one,” said Hermann Salenbauch, Ford Performance director. “By extending the Ford GT production run for a limited period, we’re able to maintain the exclusivity of the ultra-desirable supercar while offering the ownership experience to a greater number of customers.”

Ford is re-opening the application window to customers hoping to join the exclusive group of Ford GT owners starting Nov. 8 for select global markets. Prospective owners will be able to submit their applications for 30 days at FordGT.com.

Successful applicants will work with the Ford GT Concierge Service for a personalized purchase experience of cars produced in the 2020 to 2022 calendar years.

Production of the Ford GT – powered by a twin-turbocharged, 3.5-liter EcoBoost V6 engine and featuring a carbon fiber architecture, active aerodynamics and 216 mph top speed – began in December 2016.
